

## PROFESSIONAL EDUCATION

# Endoscope Reprocessing Train the Trainer (TTT) Course

## Course Overview

The Endoscope Reprocessing Train the Trainer (TTT) Course is the first comprehensive training course of its kind offered in Australia and New Zealand. The complexity of reprocessing flexible and rigid endoscopes demand a standardised approach that is consistent procedure after procedure. The three-day TTT Course is designed to provide participants with information, competency tools and hands-on training. This enables them to have the resources, knowledge and skills required to establish training programs within their hospital or region.

## Learning Objectives

- Learn correct procedures for reprocessing all models of Olympus endoscopes utilised within the relevant department
- Gain an understanding of the current guidelines, standards and best practices
- Gain the knowledge and skills necessary to develop and implement a continuing education/quality assurance program in their facility to promote safety of patients and staff
- Receive the tools necessary to assess and validate the competency of all personnel involved with the reprocessing of flexible and rigid endoscopes & accessories
- Evaluate common reprocessing errors and how they correspond to endoscope repairs
- Discuss proper endoscope care, handling and storage
- Learn the basics of infection control, occupational health and safety and how to apply it to their practice

## Training format

### Day One: Course

Didactic and hands-on demonstrations by an Olympus Clinical Educator.

### Day Two & Three: Onsite Visits

One-on-one sessions with a Clinical Educator, covering onsite processes and troubleshooting enquiries.

## Materials

Participants will be provided with a cleaning competency checklists, the course training presentations and cleaning manual/reference guides for the specific scopes used at their site.

## Certification

Attendees may claim up to seven hours of Continuing Professional Development (CPD) for day one course.

## Cost
